# Customers want more value from their data

---

Growing  
exponentially

---

From new  
sources

---

Increasingly  
diverse

---

Used by  
many people

---

Analyzed by many  
applications

# Put data **to work**

Make better  
decisions

Improve  
efficiencies

Respond  
faster

Uncover  
opportunities

# Data issues limiting organizational insights

**Difficulty finding and understanding data**

**Lack of interoperability and data harmonization**

**Minimal or no access to detailed constituent or student data**

**Limited collaboration to accelerate insights and enhancements**

**Limited confidence in the quality of the data**

# Successful data-driven organizations:

Treat data as  
an asset

Operationalize  
their data strategy  
to align not just  
processes and  
technology, but  
also their people

Provide a  
federated data  
governance and  
compliance model  
between data  
producers and  
data consumers

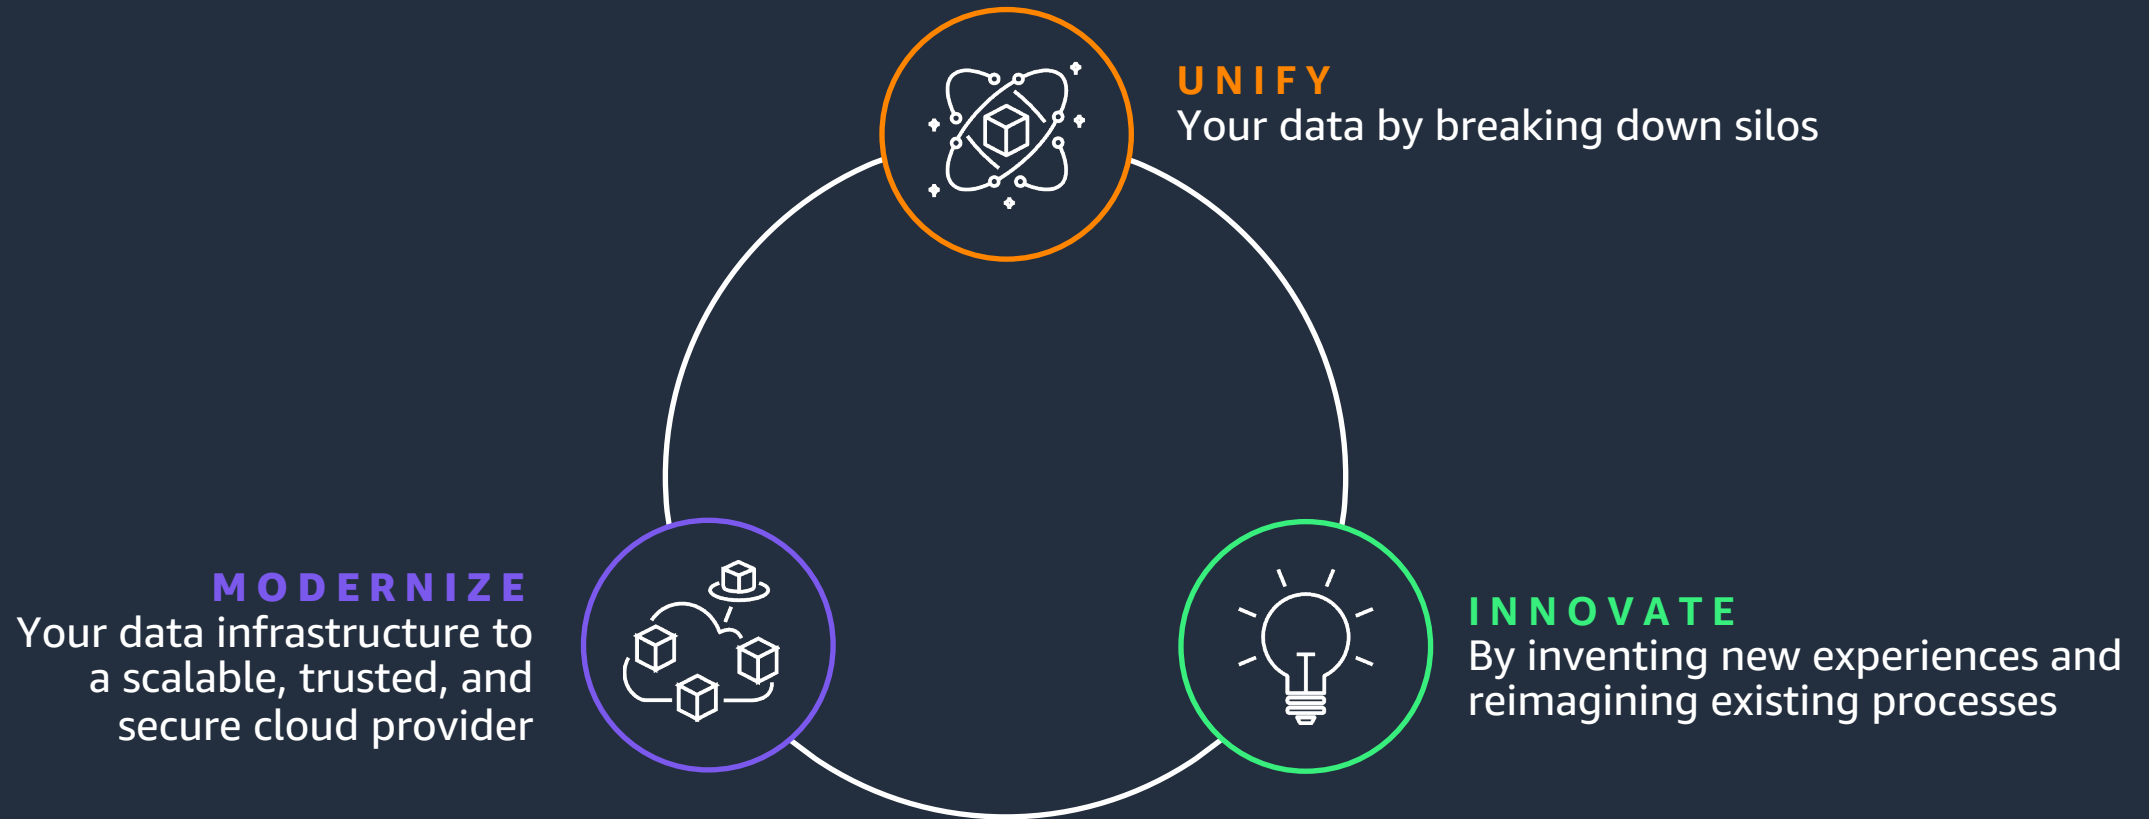

Collaborate and  
share data across  
the enterprise  
and with third-  
parties to drive  
mission and  
student impact

# Modern data strategy

# Modern data strategy for better organizational outcomes

# Modernize

MODERNIZE DATA INFRASTRUCTURE FROM A LEGACY SOLUTION TO A SCALABLE, TRUSTED, AND SECURE CLOUD PROVIDER

- Reduce operational overhead with purpose-built, cloud-based databases
- Modernize analytics tools to handle structured, unstructured, and streaming data—at scale
- Standardize on a modern ML infrastructure to harness the ML benefits at scale

# Unify

**BREAK DOWN SILOS, SO DATA CAN BE PUT TO WORK ACROSS DATABASES, DATA LAKES, ANALYTICS, AND ML SERVICES**

- Unify your data and make data accessible and shared in a secure way
- Confirm that data can easily get to wherever it's needed, with the right controls
- Enable analysis and insights through analytics, visualization, and ML tools

# Innovate

INVENT NEW EXPERIENCES AND REIMAGINE PROCESSES WITH PURPOSE-BUILT DATABASES, ADVANCED ANALYTICS AND ML

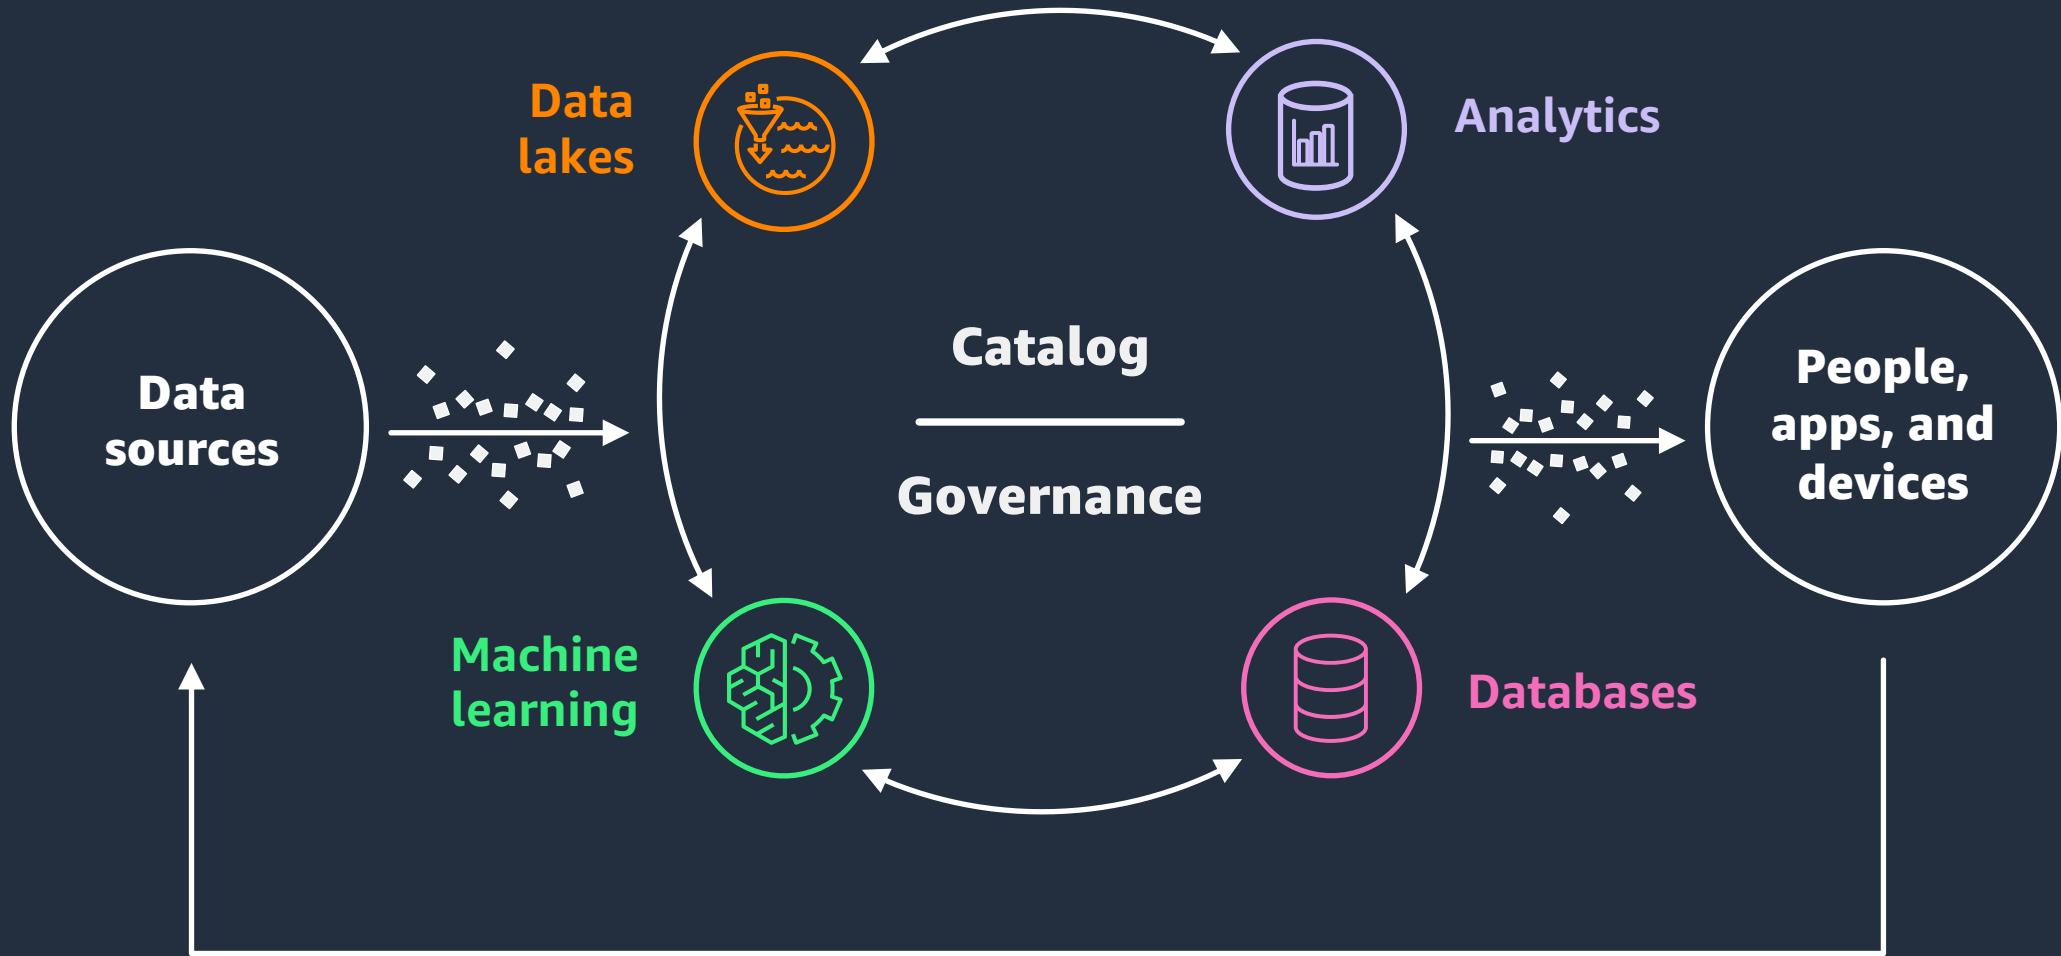

- As the types of data and workloads evolve, the databases, analytics tools, and ML services need to evolve
- ML is driving unprecedented levels of innovation
- Create better customer experiences with insights and predictions enabled by ML

# Amazon QuickSight

CLOUD-NATIVE BI SOLUTION  
FOR ILLUMINATING  
ORGANIZATIONAL INSIGHTS

Auto-scaling and serverless

Internal and/or external users

Deeply integrated with AWS services

Augmented insights on-demand

# AI answers to questions of data on demand

DEEP INSIGHTS AT YOUR FINGERTIPS

## Executive summaries of dashboards

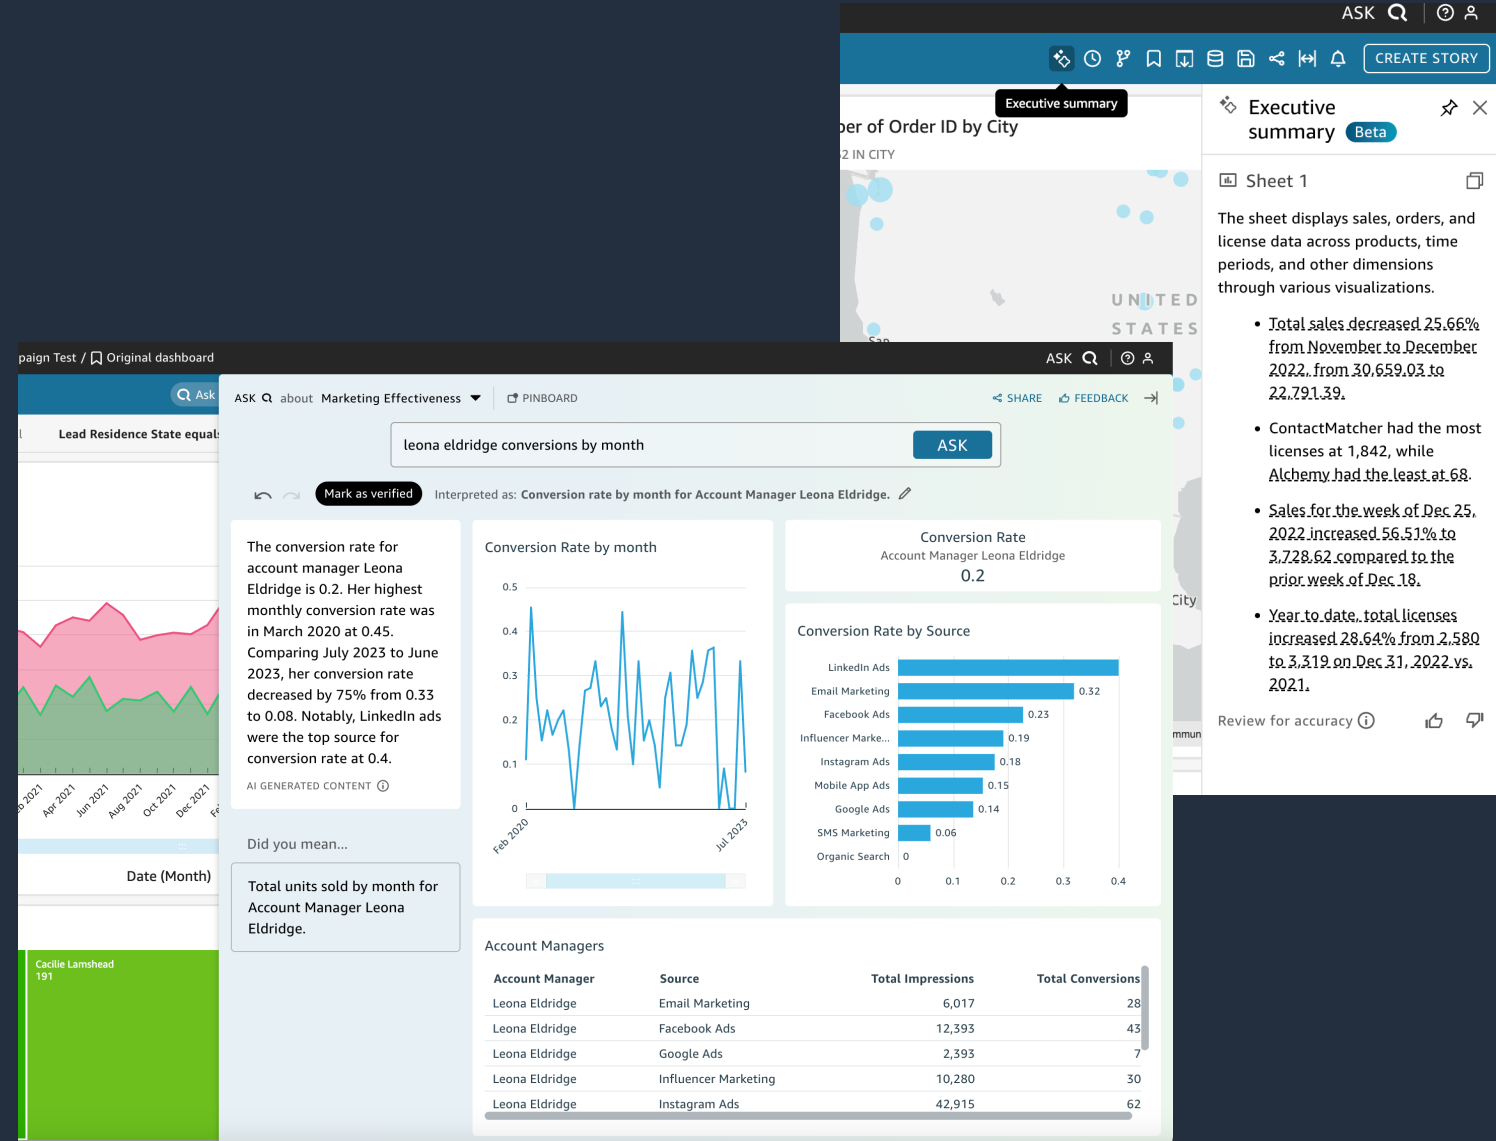

Instant summaries of key dashboard insights in natural language explaining top movers, outliers, and more

## Easy powerful Q&A for non-experts

Suggested questions and “what’s in my data” show what can be asked

Multi-visual answers with narrative insight summaries explain answer context

Vague question support and “did-you mean” alternatives enable iterative fact finding

# AI-assisted storytelling

## IMPACTFUL DATA STORYTELLING TO DRIVE ACTIONS

### Interpret data for others

Help others derive meaning from data and reach conclusions to drive decisions

### Generate stories using AI

Generate cohesive, powerful, and insightful narratives by analyzing data with only a few words

### Create refined content

Control AI verbosity, customize narrative text, and apply stunning visual themes to bring content to life

### Governed and always up to date

Quickly and easily share and update data any time

## A Data-Driven Journey: Optimizing Marketing Performance Through Insights

Prepared by [Name]

### Introduction

As we examine how to maximize success across our marketing efforts, we will analyze campaign results over time to understand what strategies have been most effective. By identifying our goal is to optimize processes and targeting approaches to continue improve
